

KEIM DESIGN-LASUR

CONQUEST OF LIGHTNESS –
TRANSLUCENT ELEGANCE WITH GLAZING
TECHNIQUES

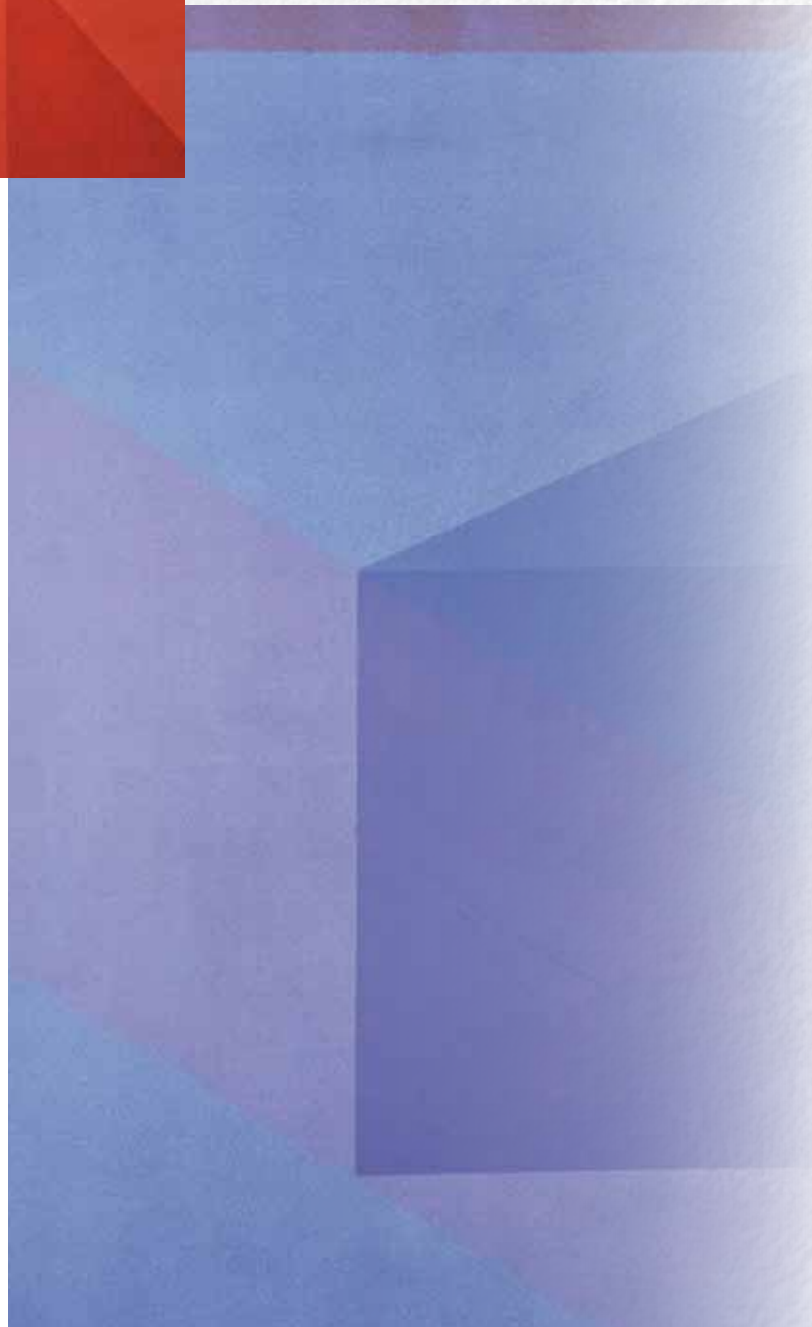

FASCINATING LIVING WALLS

Wall designs in lazure technique fascinate by their truly vivid character: Whether they decently shimmer or vigorously vibrate, on a facade or on interior walls, whether they are of subtle simplicity or spectacular finesse – the immediacy of their effects captures the eyes.

Products of KEIM Design-Lasur-System provide unlimited possibilities to the creative designer. The transparency of the silicate material can be performed in various ways: From opaque to highly translucent - everything is possible.

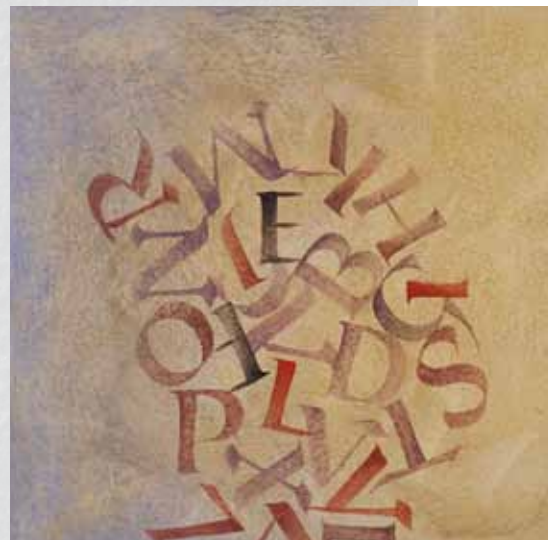

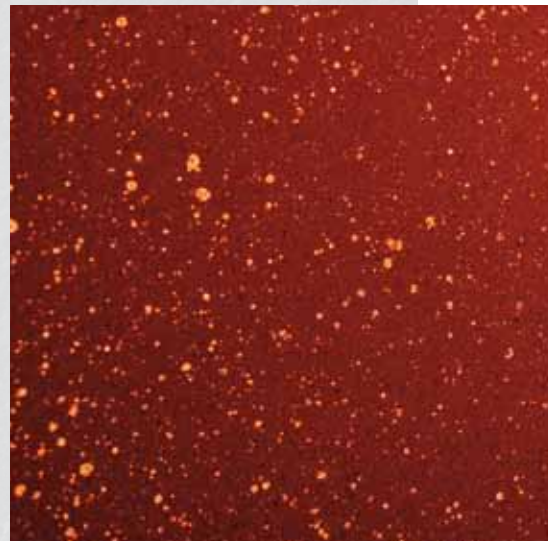

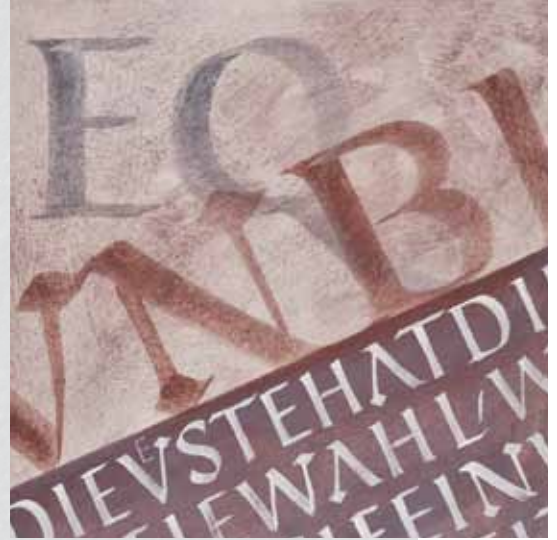

The choice of adding two different products to the KEIM Design-Lasur allows additional, special effects.

Mixture with KEIM Design-Base provides a transparent application, even by roller, resulting in a fantastic colour depth.

Using KEIM Design-Fixativ as dilution is recommended for a highly translucent design.

Also in combination with other creative techniques, the silicate lazure method offers incredible options like for example calligraphy or sprinkling technique.

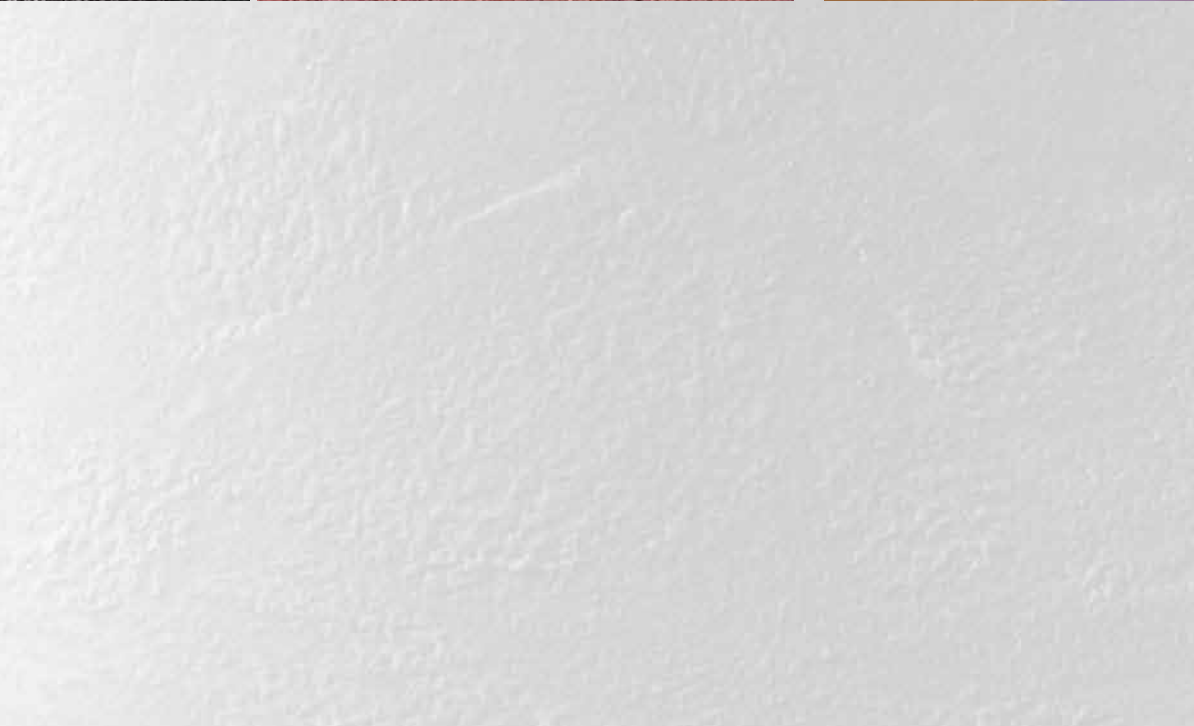

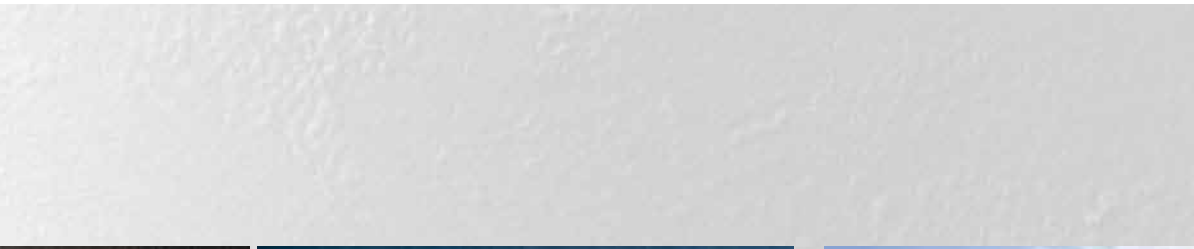

ELEGANCE OF MINERAL GLAZE COATINGS

No matter which kind of the many individual creative techniques is used: A matt and noble character of a skilfully applied mineral glaze paint adds life to the wall to almost appear like an independent artwork.

Glaze paints are ideally suited „to refine“ most various substrates. They provide surfaces that captivate the eye of the observer with the exciting interplay between calm homogeneity and lively transparency of a glaze finish. Overall, the surfaces fascinate with elegant colour depth, and at the same time underline the architecture of a building in a very decent way without being dominating.

The number of techniques that can be performed is unlimited and diverse, and so are the application fields of a mineral glaze finish. Glaze designs are used for high-class restorations in the field of historic preservation, but also inside and outside of buildings with a modern architectural style. Both facades and interior walls are accentuated in a very special way.

UNIQUE!

Four vibrant metallic colour shades of KEIM Design-Lasur allow fascinating effects. KEIM Design-Lasur – experience something special!
